ABOUT

I study Data Engineering and Analysis at Rzeszów University of Technology. I've been programming since technical school, from small tools to my own homelab.

EXPERIENCE

- 02.2026-05.2026

Junior Implementation Consultant • BMM

Głogów Małopolski • 4 months

I analysed hospital processes, configured document workflow and approval paths to match them, and trained and supported staff after go-live.
- 2025-present

Machine Learning Science Club

Rzeszów University of Technology

Team projects in data analysis and machine learning (data preparation, building and evaluating models) and hackathons.
- 2023, 2024

Internship • MF-COMP

2 months

Alongside hardware diagnostics and repair, I built a Python program for the service that automated taking in repair requests and was used every day.

PROJECTS

- figielak.dev

Personal site with a live dashboard

Astro • TypeScript • Docker • Google Cloud Run • Cloudflare • Firestore

A profile page and a dashboard with live data (GitHub, WakaTime, Last.fm, weather, homelab) from its own API endpoints; deployed from GitHub Actions to Cloud Run.
- Homelab

Homelab stats agent

Docker • Raspberry Pi • Linux

A container on a Raspberry Pi that collects machine load, service uptime and ad blocking every minute and pushes anonymised data to the dashboard.
